

Deepdev
BUSINESS ADVISORS

Company profile · September 2026

Building a sustainable business

Consulting · Investment advisory · DDB AI & Automation

A Kathmandu business consulting firm serving domestic and international clients — from company set-up and foreign investment to AI-enabled outsourcing for firms in Australia, Singapore, the UK, US, Europe, the Middle East and India.

Who we are

A business consulting firm in Kathmandu, serving clients in Nepal and abroad. We work through innovation, system-driven value and support that can be acted on.

OUR VISION

To be a global advisory firm that helps clients build sustainable businesses – growing, improving returns and handling complexity as markets change.

What drives our work

Innovation

Better ways to run a process, structure a deal or reach a market – tested against the numbers.

System-driven value

Sound systems outlast individual effort. We build processes and controls that keep working after we step back.

Strategic support

Advice is useful only when it can be acted on. We stay from analysis through to implementation.

Our approach

We work through one of three approaches, or a combination of them, depending on what the engagement needs.

Expert

We provide advice or a service the client cannot provide in-house.

Expert-client

We work inside the organisation to diagnose the problem and put the remedy in place.

Process consultation

We build the client's own capacity, so the organisation can solve the next problem itself.

Where we work

Head office: 6th Floor, 428 New Baneshwor, Kathmandu-31 (near Eyeplex Mall). Branches: Biratnagar, Butwal, Dhangadhi, Lamki. International contact office: Gurugram (Gurgaon), NCR, India. Markets served: Australia, Singapore, United States, United Kingdom, Europe, Middle East, India, wider Asia.

What we do

FLAGSHIP SERVICE LINE

DDB AI & Automation

Our flagship offer for global clients: accounting, reporting and operations run with AI-assisted workflows and reviewed by qualified professionals in Kathmandu.

AI-assisted capture and reconciliation · Reporting under seven frameworks · Human review on every deliverable

Global Outsourcing

AI-ENABLED

Finance, reporting and assurance support delivered from Nepal for firms in Australia, Singapore, the UK, US, Europe and India.

Business Establishment

Idea to launch in Nepal: feasibility, legal formalities, budgeting, team and supply chain.

Business Process Automation

AI-ENABLED

SOP, ERP and tax automation that takes manual effort out of finance and operations.

Investment Advisory

Research-based guidance on investment strategy and opportunities, matched to your goals and risk tolerance.

Real Estate & Share Market Advisory

Property, infrastructure and capital market advice — from raw land to listed shares.

Financial Modelling & Analysis

AI-ENABLED

Forecasts, peer comparisons and action plans built on models you can rely on.

FDI & Deal Negotiation

The foreign investment route into Nepal — approvals and compliance — and negotiation on contracts, brands and goodwill.

Crisis Management

Practical support through downturns, leadership changes and restructuring: liquidity, retrenchment, continuity and compliance.

Non-Resident Investment Advisory

A structured route into Nepal for non-resident investors: analysis, approvals, structure, entry and exit.

Enterprise Supplies

Our product line: equipment, materials and consumables supplied to businesses and projects, with the logistics behind it.

Engagement models

Dedicated team

A team assigned to your work, following your processes and calendar.

Shared capacity

Monthly or as-needed support for defined volumes, without a fixed headcount.

Project or short term

Year-end support, backlog clean-ups, system migrations and one-off reviews.

Fractional leadership

CFO, CEO or MD-level support on a long-term or short-term basis.

How we serve global clients

Automation, AI-assisted workflows and a qualified team in Kathmandu take accounting, reporting and operational processes off your desk — on your timetable. Dedicated desks serve Australia and Singapore.

01

Scope and secure set-up

We agree processes, volumes, deadlines and review standards, then set up access in the systems you approve.

03

Automated processing

Matching rules, recurring journals and bots prepare reconciliations, schedules and report packs to a set timetable.

02

AI-assisted capture

Invoices, receipts, statements and payroll inputs are read and coded automatically. Anything unclear is queued for a person.

04

Professional review and reporting

A qualified reviewer checks every output, resolves exceptions and releases the pack with open queries listed.

What you can hand over

Bookkeeping & accounting

Day-to-day ledger work, payables, receivables and bank reconciliations.

🤖 AI reads and codes documents; bank rules clear routine items.

Financial reporting

Month-end and year-end packs under seven reporting frameworks.

🤖 Draft schedules and variance commentary from your trial balance.

Assurance support

Working papers, testing support and file preparation for accounting firms.

🤖 Full-population analytics highlight unusual items for testing.

Payroll & HR administration

Payroll inputs, HR records and related accounting.

🤖 Validation checks compare each run with the last one.

Tax compliance support

Data preparation and reconciliations behind your filings, including BAS and GST cycles.

🤖 Automated tie-outs between ledgers, returns and schedules.

Virtual CFO, CEO & MD support

Management reporting and decision support, long term or short term.

🤖 KPI dashboards that refresh from source data.

IT support

Support for the systems your finance and operations teams rely on.

🤖 Ticket triage and knowledge-base answers for routine requests.

Process automation & ERP

SOP automation, ERP implementation support and tax automation.

🤖 Bots and rules for recurring work, with exception routing.

Clear roles

AI and automation read documents, match transactions, draft schedules and flag unusual items. Our professionals set the rules, investigate exceptions, and review and sign off every output before it reaches you.
